

CROSS COUNTRY CANADA SUPPLIES & RENTALS

SHOW DAWGS

PIPELINE • CONSTRUCTION • OIL & GAS • UTILITIES • MANUFACTURING

Show Dawgs offer the safest approach to assist in manipulating hi low with external pipe welding clamps, providing a safer and more efficient alternative to traditional methods such as wedges and hammer dogs.

PIPE INSTALLATION

Show Dawgs simplify the process of installing pipes of different sizes, ranging from 16" to 84". Their swivel feet prevent scratching on the pipe's surface, ensuring the integrity of the pipe during installation.

SAFETY

Traditional methods like wedges and hammer dogs often pose hazards due to the use of hammers and the potential for pins to become dislodged forcefully. Show Dawgs mitigate these risks, providing a safer working environment for pipe work.

PIPE MAINTENANCE

Show Dawgs offer extra accuracy during maintenance tasks such as replacing pipe sections. Keep gauges in the pipe while using Show Dawgs, allowing for real-time monitoring and adjustments.

EFFICIENCY

By streamlining the pipe work process and eliminating the need for additional tools like hammers, Show Dawgs enhance efficiency. Workers can complete tasks more quickly and with greater precision, leading to overall time and cost savings.

PIPE REPAIR

Show Dawgs provide a safer alternative to traditional pipe repair methods by eliminating the need for hammers, reducing accidental pipe damage and the risk of injury from flying pins.

VERSATILITY

Show Dawgs are suitable for use across various industries that deal with large-scale piping systems. From oil and gas to construction, utilities, and manufacturing, Show Dawgs find applications wherever precision, safety, and efficiency are paramount.
