

CROSS COUNTRY CANADA SUPPLIES & RENTALS CULVERTS

CIVIL CONSTRUCTION • INFRASTRUCTURE • MINING • UTILITIES

CSP CULVERTS - BUILT TO LAST

With a robust corrugated steel construction, our CSP culverts offer unparalleled strength and durability, ensuring dependable performance for vital infrastructure projects. From highways to railways, bridges to drainage systems, trust in the enduring resilience of Corrugated Steel Pipe Culverts

- **Galvanized:** Standard 25-year service life, ideal for low-abrasion conditions.
- **Aluminized Type 2:** Lasts 75 years, offering superior corrosion resistance in harsh environments.
- **Polymer-Laminated:** With a service life of over 100 years, this heavy-gauge film provides ultimate protection against acids and alkalis in aggressive settings.

HDPE CULVERTS - FLEXIBLE SOLUTIONS

High-density polyethylene (HDPE) culverts are lightweight yet mighty, these culverts flexibly navigate diverse terrains, from urban stormwater management to agricultural irrigation.

- **Perforated:** Manages drainage with factory perforations, preventing moisture buildup and damage, suitable for subdrain or recharge drains.
- **Non-perforated:** Solid construction without pre-drilled holes, ensuring structural integrity, ideal for applications not requiring controlled water flow.
- **Perforated with Sock:** Enhances drainage with a geotextile sock, preventing soil intrusion while allowing water passage, useful for precise water control applications such as greenhouse leachate collection.
