

CROSS COUNTRY CANADA SUPPLIES & RENTALS PIPE WELDING/CUTTING EQUIPMENT

PIPELINE • OIL & GAS FACILITIES • CONSTRUCTION • UTILITIES

INTERNAL LINEUP CLAMPS

DMI - Sizes 6", 10", 12"

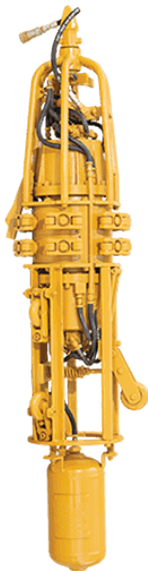

Self Centering Internal Pneumatic Lineup Clamps

A self adjusting mechanism is provided in the rear of the clamp to the middle of the pipe and to reduce offset between the two pipes being joined together.

SCAIP - Sizes from 8" and 60"

SLC Series: For pipe welding with coated electrode process.

SLCA Series: For pipe welding with automatic MIG/MAG process, with backing of the welding both made with copper pads.

TACK RIGS

- Cat D6N Tack RIG
- Morooka Tack Rig

Offers the exceptional performance, productivity and versatility required to facilitate the building of pipeline infrastructures.

CROSS CLAMP - EXTERNAL LINE UP CLAMPS

Introducing the CCCSR External Line Up Clamps – an innovative solution enhancing pipeline welding quality and safety. Designed for maximum weld access without the need for clamp rolling, these clamps reduce the risk of cracked welds upon removal, setting them apart from

industry alternatives. CCCSR Line Up Clamps not only streamline welding but also boost efficiency, reducing setup time—especially valuable in high-volume welding scenarios. (Patent Pending: 63/484,138)

RATCHET STYLE
SIZES 10" - 84"

Alignment bars parallel with hinges.

Jack screws on the outside to allow more weld access and increase tightening torque.

CAMLOCK STYLE
SIZES 3" - 16"

IDMAG DEMAGNETIZATION SYSTEM

Runs on 120V-250V power, making it versatile for use in various locations. It's robust, enduring tough conditions, resistant to weather, dust, and crushing.

- Portable & Lightweight
- Single Phase, 50/60hz
- Sealed Panel/Switches
- Expandable for more Power
- Use on Valves, Vessels & Plates

WI DEMAGNETIZATION COILS

Demagnetization takes less than 2 minutes per end and remains demagnetized for several days, to an acceptable level for Welding of +/-2 Gauss.

- 8 5/8", 10 3/4", 14", 16", 18", 25", 32", 38", 44" 50", and 60" ID)
- 14" 115V-6HZ
- 25" 230V-50HZ
- 38" 230V-60HZ

MATHEY/SAWYER BEVELING EQUIPMENT

A full selection of pipe beveling equipment.

- **Beveling Machines**
Mathey 2-4", 3-8", 6-12", 12-20", 24-30"
Sawyer Quickset 1.5-4", 3-8", 8-14", 14-20"
- Beveling Bands 10"-84"
- Bevel Crawlers, whip, motor & remotes
- Victor Barrel Torches 8.5", 14"
- Angle Heads

AUTO WELD SHACKS

10'x12'

- Adjustable doors from 12" to 48"
- Folding Floor Panels
- Engineered Lifting Hooks
- Dry Weight 4300lbs
- Power/Lighting set up to customer specifications

COLD CUTTERS

2-4", Rigid 6", 6-8", 10-14", 16-18", 20-22", 24-26", 28-34"

Reed cold cutters to cut large diameter steel, most stainless steel, ductile and cast iron pipe in close quarters

ULTRA RIM CLAMPS

Available sizes 12-48"

- Plated jackcrews with pivoting pads for precise reforming pressure
- Stainless steel pivot points
- Heavy-duty latching mechanism

KC CLAMPS

10"-84"

- Screw type clamp with reversible ratchet
- Machined pads to fully contact O.D. of pipe
- High clamping, even pressure for maximum alignment
