

WHAT YOU NEED TO KNOW ABOUT

GRID GUARD

HD-PLUS PIPELINE ROCKSHIELD

CROSS COUNTRY CANADA SUPPLIES & RENTALS 780-962-6559

EASY INSTALL

Half the weight of the competition making it much less taxing to handle and apply.

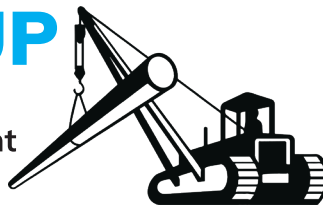

IMPACT PROTECTION

Grid Guard offers an impressive 30% more impact protection during backfill operations substantially reducing the potential for damage.

WON'T BUNCH UP

Consistent and uniform structure that is dimensionally stable and won't get caught on uneven areas or bunch up in cradles.

ECONOMICAL FREIGHT

Lighter than competitors, freight providers can maximize square footage per load, reducing freight costs.

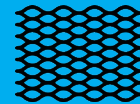

COLD RESISTANT

Unlike the PVC material of competitors, Grid Guard is made of Polyethylene which remains impact resistant and durable at extreme cold temperatures.

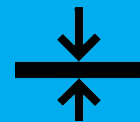

SPECS

3D Diamond Mesh/Grid

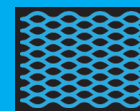

Extruded Polyethylene

3/8" Thickness

No Cathodic Protection Interference

6oz Non-Woven Geotextile Backing

Weight 0.45 lb/ft²

SIZE MATTERS

- Rolls up to 50" for less overlap, less labour and cost savings
- Up to 18" spacing between tape wraps
- Custom size pads and rolls for tailored applications
- Pipeline diameter from 2" - 48"

POST BURIAL PROTECTION

Grid-Guard HD Plus acts as a slip sheet around the pipe, minimizes soil stress on tapes and coatings, and provides additional protection after burial.
