

# CROSS COUNTRY CANADA SUPPLIES & RENTALS FIRE SUPPRESSION TRAILERS

PIPELINE • CONSTRUCTION • AGRICULTURE • LANDSCAPING

Deployed primarily for fire-fighting purposes, our fire suppression trailers stand out for their robustness, endurance, and dependability, enhancing safety at remote worksites.

## FEATURES

- Two 500-gallon water tanks ensure ample water supply during firefighting efforts.
- A reliable 5-kilowatt generator (Honda EB 5000X) powers essential equipment on-site.
- With 500 feet of fire hose, consisting of 5 x 100-foot hose sections with couplers, firefighters have the flexibility to reach various points on the fire ground.
- A motorized hose reel simplifies hose deployment and retrieval, enhancing operational efficiency.
- Two lockable tool boxes provide secure storage for firefighting equipment and tools.
- The Honda WH20XT 2-inch high-pressure water pump delivers impressive performance, capable of spraying water up to 80 feet at full hose length.
- Ample basket space allows for the convenient storage of shovels and other essential tools, ensuring quick access during operations.
- Built with rugged construction suitable for off-road use, these trailers can withstand challenging terrain conditions, ensuring they remain operational in remote locations.

In addition to their primary role in fire management, our fire suppression trailers find versatility in various applications. From transporting water to controlling dust by spraying roadways, and assisting in landscaping tasks, these trailers serve as indispensable assets in diverse settings.
