

CROSS COUNTRY CANADA SUPPLIES & RENTALS

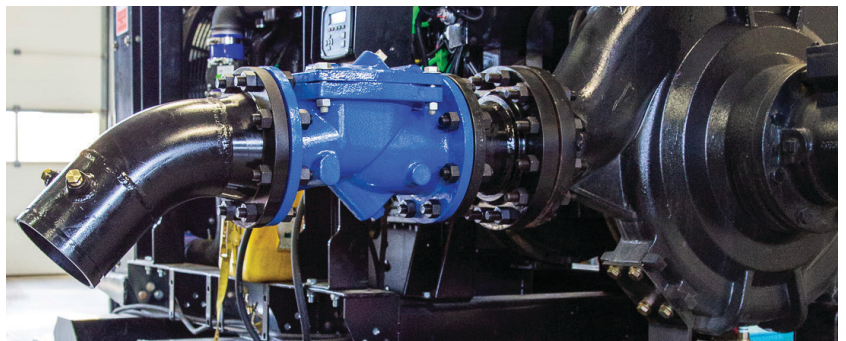

PUMP MANUFACTURING

CUSTOM INDUSTRIAL PUMPS TAILORED TO YOUR SPECIFICATIONS

CUSTOM-BUILT EXCELLENCE

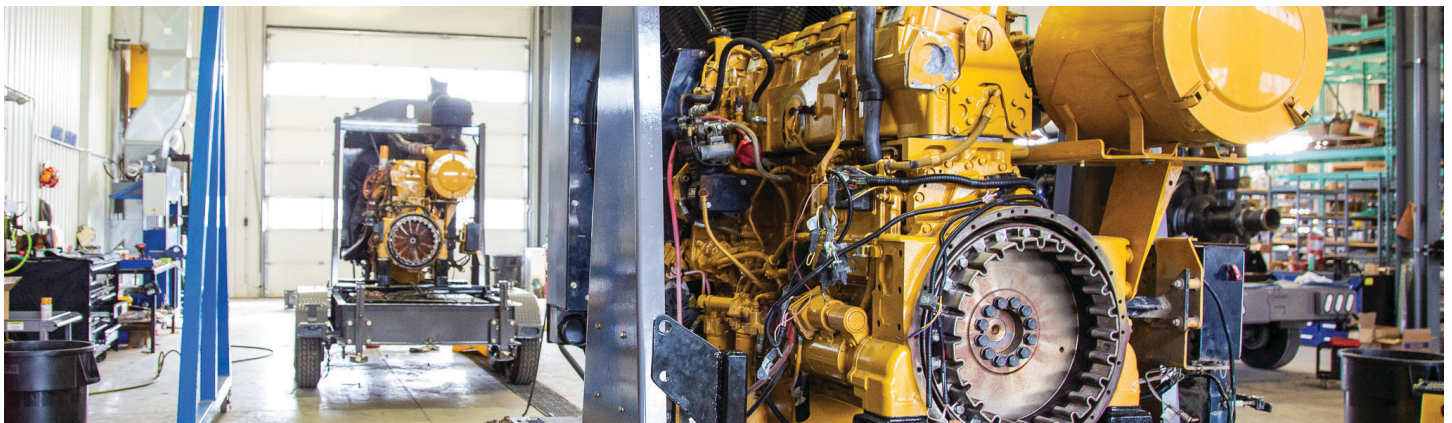

At Cross Country Canada, we specialize in crafting industrial fluid high head pumps tailored to meet your unique requirements. Our commitment to precision and performance ensures that each pump is a custom-built solution, delivering unparalleled efficiency in fluid management.

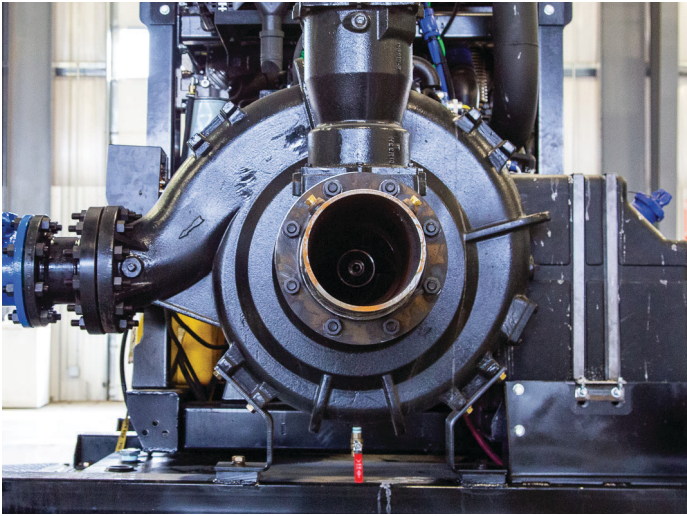

Choose Cross Country Canada for unmatched quality, reliability, and customized solutions in industrial fluid high head pumps. Contact us today to discuss your unique requirements and elevate your fluid management capabilities.

INDUSTRY LEADING BRANDS

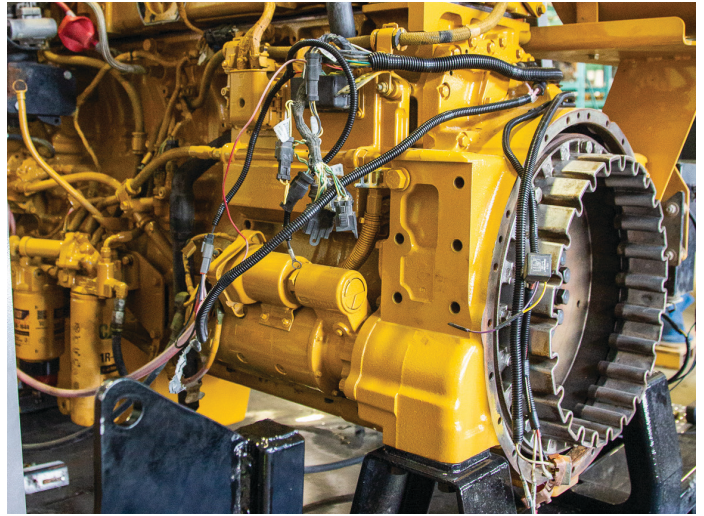

We offer a diverse inventory of in-stock Cornell parts, ensuring swift access to the components essential for peak performance. Count on us for a seamless blend of innovation, reliability, and a comprehensive selection of components, all geared towards optimizing your equipment's peak performance.

VERSATILE PUMP SIZES

Cross Country Canada offers a diverse range of pump sizes, including versatile configurations such as 12x8, 10x8, 8x6, 6x6, and 4x4. We specialize in building pumps to suit your specific application needs, providing not only flexibility but also scalability to effectively address a wide array of pumping challenges.

POWERFUL ENGINE OPTIONS

Enhance your pumping operations with premiere engine choices. Cross Country Canada assures that your fluid pumping solutions are driven by top-tier engines, featuring esteemed brands such as CAT, Cummins, and Deutz, ensuring unparalleled performance, capability and reliability.

IN-HOUSE FABRICATION

Experience seamless integration with our in-house fabricated trailers, meticulously constructed in our CWB-certified fabrication shop. Our highly skilled team ensures precision and durability in every detail, guaranteeing that our tandem axle trailers, with a robust 10,000lb capacity, provide not only reliable transportation but also facilitate the effortless deployment of your pumping equipment.

TELEMATIC COMPATIBILITY

Stay connected and in control with our telematic-compatible pumps. Cross Country Canada pumps seamlessly integrate with both AEC and Controls Inc. systems, providing real-time monitoring and control for enhanced operational efficiency, empowering you to optimize performance and respond promptly to changing conditions.

ENHANCED FEATURES

Our pumps are equipped with essential safety features, including full containment, air shutdown, document holders, and fire extinguishers as standard. Alongside a lifting bridle and LED work lights, these features enhance on-site usability and safety. Additionally, with a minimum of 10-12 hour run time, our pumps are thoughtfully designed for extended efficiency.
