## **TUT UTILITY TRUCKS**

Introducing the TUT Utility Truck - the ultimate workhorse that leaves the competition in the dust. Made in the USA, this utility truck is designed for those who demand top-notch performance and unparalleled durability.

The TUT markedly outdoes the competition in engine power alone with a whopping 500hp. You'll be able to tackle any job with ease, whether it's hauling heavy equipment or navigating rough terrain. And with its front and rear suspension, you'll enjoy a smooth and comfortable ride.

Unlike other utility vehicles, the TUT is fully amphibious, making it the perfect choice for tackling any job, no matter the terrain. With 4-wheel crab steering, you can maneuver easily in any direction. And when the weather gets harsh, the TUT has you covered with a fully air-conditioned and heated cab.

The TUT Utility Truck is not just any ordinary utility vehicle. It is a versatile machine that can handle a wide variety of tasks

with ease, making it the perfect choice for search and rescue, firefighting, and remote access use.

But what truly sets the TUT apart is its accessibility. You won't have to worry about importing parts or waiting for long shipping times. With it's Chevy/GM make, all parts are easily accessible at any local auto parts store. And with full customization options available, you can make your TUT uniquely your own.

- Recreation
- Remote Access
- Search & Rescue
- Construction/Mining
- Farm & Ranch
- Military/Defense
- Firefighting
- Exploration
- Expeditions
- Oil & Gas

## **THE NEXT GENERATION OF UTILITY VEHICLES**

### **SUSPENSION**

The TUT Utility Truck features adjustable front and rear suspension. This allows drivers to adjust the suspension system to match the terrain they are driving on and provide a smooth and comfortable ride. Whether you're driving on rugged terrain or smooth roads, the TUT's adjustable suspension system ensures that you'll have a smooth ride with maximum control. The TUT Utility Truck is truly a revolution in the utility vehicle industry, offering advanced features and functionality that will enhance any driving experience.

### **FULLY AMPHIBIOUS**

The TUT Utility Truck is a one-of-a-kind amphibious vehicle that can easily traverse through water and land. Its exceptional design makes it the ultimate choice for commercial, industrial, and defense use. With its ability to float on water, the TUT is a perfect solution for search and rescue missions, backcountry access, and flooding applications. It can effortlessly navigate through bodies of water such as lakes, rivers, and swamps, and its sturdy build makes it ideal for extreme amphibious enthusiasts who want to explore areas that are inaccessible to other vehicles.

### **4 WHEEL STEERING**

The TUT Utility Truck sets a new standard in the utility vehicle industry with its innovative 4-wheel steering system. Unlike other vehicles that rely on traditional 2-wheel steering, the TUT's 4-wheel steering system allows it to move diagonally, providing enhanced maneuverability and control. This feature is especially useful for commercial and industrial applications, where navigating tight spaces and obstacles is a common challenge. The TUT's 4-wheel steering system provides drivers with a new level of precision and control that was previously unavailable in utility vehicles.
