**Hydraulically controlled rear door** adjust final product size while machine is working

**Forged and hardened interchangeable counter-blades** for longest working life

**Adjustable extended 3 point linkage** fits perfectly with any kind of tractor

**Transmission with side gearbox** maximize the power delivered to the rotor

**System protection chains** the chains are fixed on plate and these plates screwed to the frame

### MAIN OPTIONS

**W style self aligning device between PTO drive shaft/gearbox** allows the machine to work at several angles without damaging the PTO

**Bolted grid on rear door** allows more adjustment of the final material size

**Hydraulically adjustable skids** allow you to control the rotor depth and prevent material from exiting out the sides

**Hydraulic support roller (D. 36 cm - D. 51 cm)** helps with compaction and working uneven terrain
