

# CROSS COUNTRY CANADA SUPPLIES & RENTALS DENSO COLD-WEATHER TAPES & COATINGS

## PROTAL 7125

### Fast-Cure Coating for Cold Weather

A high-build liquid coating designed for colder environments, ideal for use on in-service pipelines or during construction. It is fast-curing, allowing for quick handling and backfilling, and is suitable for winter applications or pipelines operating at lower temperatures. Can be brush or spray applied in one coat.

**EFFECTIVE AS LOW AS -20°C (-4°F)**

#### FEATURES:

- Rapid curing for fast handling and reduced downtime.
- High build and abrasion resistance, ideal for drilling.
- Compatible with cathodic protection.
- Can be brush or spray applied; repair cartridges available.

## LT-TAPE

### Cold Weather Corrosion Protection

Denso LT Tape is a petrolatum-based corrosion protection tape designed for colder climates. It provides long-lasting protection on pipes, valves, and flanges, even in cold, wet, and chemically harsh environments. The tape is UV resistant, applies to marginally prepared surfaces, and resists water, salts, acids, and soil organics.

**EFFECTIVE AS LOW AS -40°C (-40°F)**

#### FEATURES:

- Can be applied to cold, wet surfaces without solvents.
- Resists corrosion, UV rays, and environmental factors.
- Ready for immediate service and durable for years.
- Suitable for above and below-ground use, including lead paint encapsulation.

## OUR EXPERTISE

Cross Country has in-house coating specialists ready to assist with your Denso product inquiries and project needs. Whether you're dealing with petrolatum tape systems, Protal liquid coatings, or other Denso products, our team is equipped to help you find the right solution.

*Our strong alignment with Denso ensures that product application training is readily available whenever needed.*
